

Helping F&B Manufacturers Unify Quality

Veeva QualityOne enables efficient quality management for QA, QC, food safety, and training across GxPs and non GxP operations. By modernizing systems and simplifying quality processes in a single platform, manufacturers can deliver safe, high quality products that consumers trust.

Traditional quality silos and legacy systems limit speed to market and streamlined, consistent operations. Site-specific processes, manual workflows, and disconnected systems reduce efficiencies, create inconsistencies in execution, increase training burdens, and constrain collaboration.

Increase Speed to Market | Scale | Create Efficiency | Ensure Compliance

Veeva QualityOne unifies QA, QC, food safety, and training in one platform to accelerate quality processes, create efficiencies, and ensure consistent compliance across sites, partners and global teams.

With built-in automation, best practices, and data for analytics and AI, it is the foundation for proactive food safety and quality management.

The platform unifies applications which can be used independently or together: quality management system (QMS), documented content management, Hazard Analysis Critical Control Point (HACCP), training (LMS), lab management (LIMS), and batch release.

**10+ Master Data
Libraries Consolidated**

**3,000 HACCP
Plans Harmonized**

**300 Factories
Collaborating Seamlessly**

Nestlé

Capabilities

✓ Remove operational silos

Reduce cycle times, modernize processes and consolidate legacy applications by connecting and managing food safety and quality processes, content, events, and data in a unified cloud platform.

✓ Create efficiency and ensure compliance

Ensure consistent, efficient and compliant food safety and quality operations across sites – including CAPAs, non-conformances, change control, complaint handling, HACCP plans, supplier management, lab investigations, training, and more.

✓ Drive deeper collaboration across the value chain

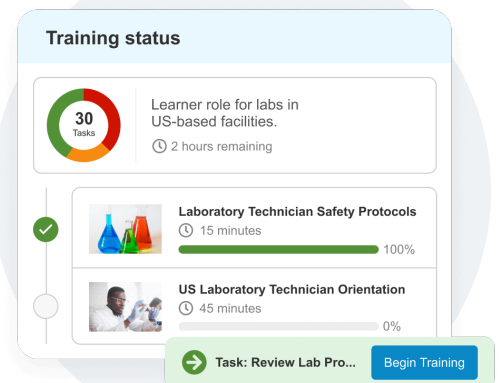

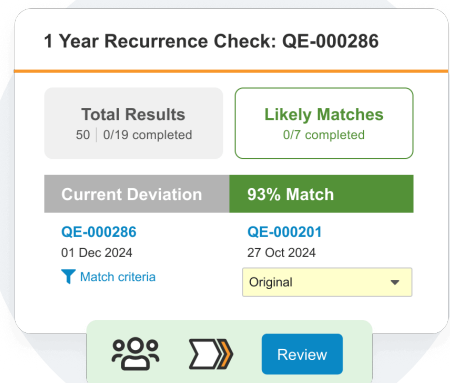

Improve communications, data visibility, and partner collaboration with external documents, and actions, SCARs, supplier change notifications and more.

✓ Build a data foundation for analytics, automation, and AI

Make timely decisions, optimize metrics, and drive proactive food safety and quality with a standardized data foundation for advanced analytics, automation, and AI.

✓ Maintain competency-based training

Empower your workforce with an efficient end-to-end training management solution for role based job qualification, compliance, and audit readiness.

About Veeva QualityOne

Veeva QualityOne helps manufacturers deliver high quality products that consumers trust. The cloud-based platform unifies applications, processes and partners across content management, Quality Management System (QMS), and training.
